YOUR PROJECT

ALBATROSS PROJECTS

As experts in high-precision electro-magnetically shielded rooms, we use our decades of experience to help create optimal conditions for MRI environments.

From initial planning to installation, whether it's a complete turnkey project or a modular kit, we tailor our shielding solutions to meet specific project requirements. Our focus is on providing flexible, reusable solutions that ensure seamless functionality. In addition, we offer comprehensive support through services, testing, and a range of shielding accessories to maintain uninterrupted operation.

WHY ALBATROSS PROJECTS?

TURNKEY

MRI Doors

MRI Windows

Magnetic Shielding
(Optional)

Two different RF
Shielding Solutions
(Galvanized Panel/
Soldered Copper)

WINDOWS

RF TIGHT WINDOWS

- High frequency tight
- High-quality ESG safety glass
- Reassurance for the patient through visual contact
- Different sizes & options:
 - Observation window
 - Daylight window
 - Privacy/Smart Glass (Optional)

Full Perspective

DOORS

DOORS ARE OUR STRENGTH

- Gapless, high and homogeneous contact pressure guarantees maximum shielding performance
- Various designs & sizes:
 - Standard
 - fully glazed
 - barrier-free
 - fully automatic doors with touch screen option.
 - Privacy/Smart Glass (Optional)

Convenient Access

DOORS

DOORS

- Albatross Projects Americas GPS is a leader in providing door solutions to the world's most complex shielding problems
- Our MRI doors stand out with a wide range of customizable options, including various finishes and color choices to suit any design preference."

DOOR UPGRADE/RESTORATION

- Albatross Projects Americas GPS can provide doors as replacements for your existing facility, or as standalone components integrated into your new facility.
- Albatross Projects Americas GPS can also provide a turnkey solution to your complete array of facility needs

MRI DOOR SERVICE PLAN

- Replace any damaged RF gasket or fingers
- Auto door operator Latching system (if applicable)
- Door to frame alignment
- Cleaning, lubrication and adjustment as required Switches (if any)
- Clean all RF contact surfaces
- Verify mechanical operation of door is satisfactory
- Provide RF Test report (annual contracts only)

BUILDING INFORMATION MODELING

- **BIM-Enhanced Project Coordination:** We utilize BIM for improved collaboration, precision, and efficiency in RF shielding projects.
- **Tailored BIM Solutions:** Our custom BIM 3D models ensure seamless integration and project visualization.

MODULE BY MODULE TO THE INDIVIDUAL SOLUTION

The modular construction method of Albatross Projects offers the freedom to create individual solutions. No matter if it's for special designs with corner bevels, column or ceiling beam conversions.

OPTIONS

SAFETY FOR PATIENTS AND STAFF

A homogeneous magnetic field is essential for the safe operation of the MRI scanner. During planning, all conditions are taken into account and, if necessary, additional shielding is integrated.

ADAPTATION TO EXISTING STRUCTURES

Our approach prioritizes maintaining the operational integrity of your existing structure while enhancing safety and performance.

*In any case
the right Solution*

QUENCH VENT SYSTEM

SAFETY WITH
STANDARD
INSTALLATION

Ensuring MRI Safety: Expert Installation of Cryogen Vent Systems

Cryogen vent systems are an essential part to a MRI's functionality. Most MRI machines use liquid helium (Cryogen) to cool down the superconductive magnet's coil. As cryogenes are released to keep the magnet cool, they evaporate into odorless, colorless, and tasteless gases and must be vented safely out of the building with the use of a cryogen vent pipe. Albatross Projects Americas GPS specializes in the supply and installation of these pipe systems.

We are familiar with the different specifications of each magnet and can assist in the design calculations before the system is installed.

- Complete solution

*When safety is your priority,
trust our Expertise*

YOUR PROJECT

start with trust.

Whether it's for University hospitals, research centers, private clinics, doctors' surgeries or state hospitals, the quality of our products and our years of experience around the world make us a competent partner for your project.

We adapt to your individual wishes, from new constructions and conversions to extensions.

*Our Experts
for your MRI room*

**INDIVIDUAL &
A PERFECT FIT**
