

## RF Vision Door

Premium RF protection with crystal-clear visibility

**STC 50**

### Doors are our strength

- Gapless, high and homogeneous contact pressure guarantees maximum shielding performance (STC 50)
- Keyless door access using passcode or card reader
- Attachment flange incorporated in our frame for easy integration with the RF room
- Swings very freely throughout its arc of up to 120 degrees. Doors with automatic features have a 90-degree maximum radius
- Optional stainless steel or plastic wear faces in areas expecting high volume of wheelchair or gurney transport patients
- Optional view windows from Hospital type view lites to full panel openings to enhance aesthetics

Albatross Projects is a leader in providing door solutions to the world's most complex shielding problems. Our RF Vision Doors provide convenient access and stand out with a wide range of customizable options, including various finishes and color choices to suit any design preference.

Our RF Vision Doors as replacements for your existing facility, or as standalone components integrated into your new facility.

Our RF Vision Door Service Plan ensures your investment is inspected frequently and aids in extending the longevity of the RF Vision Door.

Albatross Projects can also provide a turnkey solution to your complete array of facility needs.
